## STAR Partnership (State Theatrical Arts Resource Partnership)

The State Theatrical Arts Resources (STAR) partnership puts surplus state-owned assets to work for motion picture production in California. The STAR partnership was authorized and signed into law under SB2061 on Sept. 25, 2000. Through this innovative partnership, unused state properties such as health facilities and vacant office structures are available at no charge or a nominal fee to filmmakers.

### THE STAR PARTNERSHIP

- Lowers production costs
- Continually identifies new state-owned properties for filming
- Meets the needs of both long-term and short-term productions

As part of the STAR partnership, the California Film Commission (CFC) provides:

- An updated database of state surplus properties
- A one-stop film permitting office with STAR properties
- No permit fee or location fee for filming on state properties
- Production assistance
- Troubleshooting assistance

Through the use of "CinemaScout" ([www.cinemascout.com](http://www.cinemascout.com)), the CFC's interactive location website, all available STAR property information is accessible online 24/7 with detailed information about the sites and how to work with the CFC to scout and use them. Just type in "STAR Program" to get a list of STAR properties.

The CFC works in partnership with more than 55 in-state Film Liaisons in California, Statewide (FLICS). The CFC plans to establish local STAR partnerships and to similarly make available local surplus or unused government property for film and television productions.

A project of the California Film Commission
